# SEYMOUR SEEDKASTER

Manufactured by

SEYMOUR MANUFACTURING CO.  
ESTABLISHED 1872

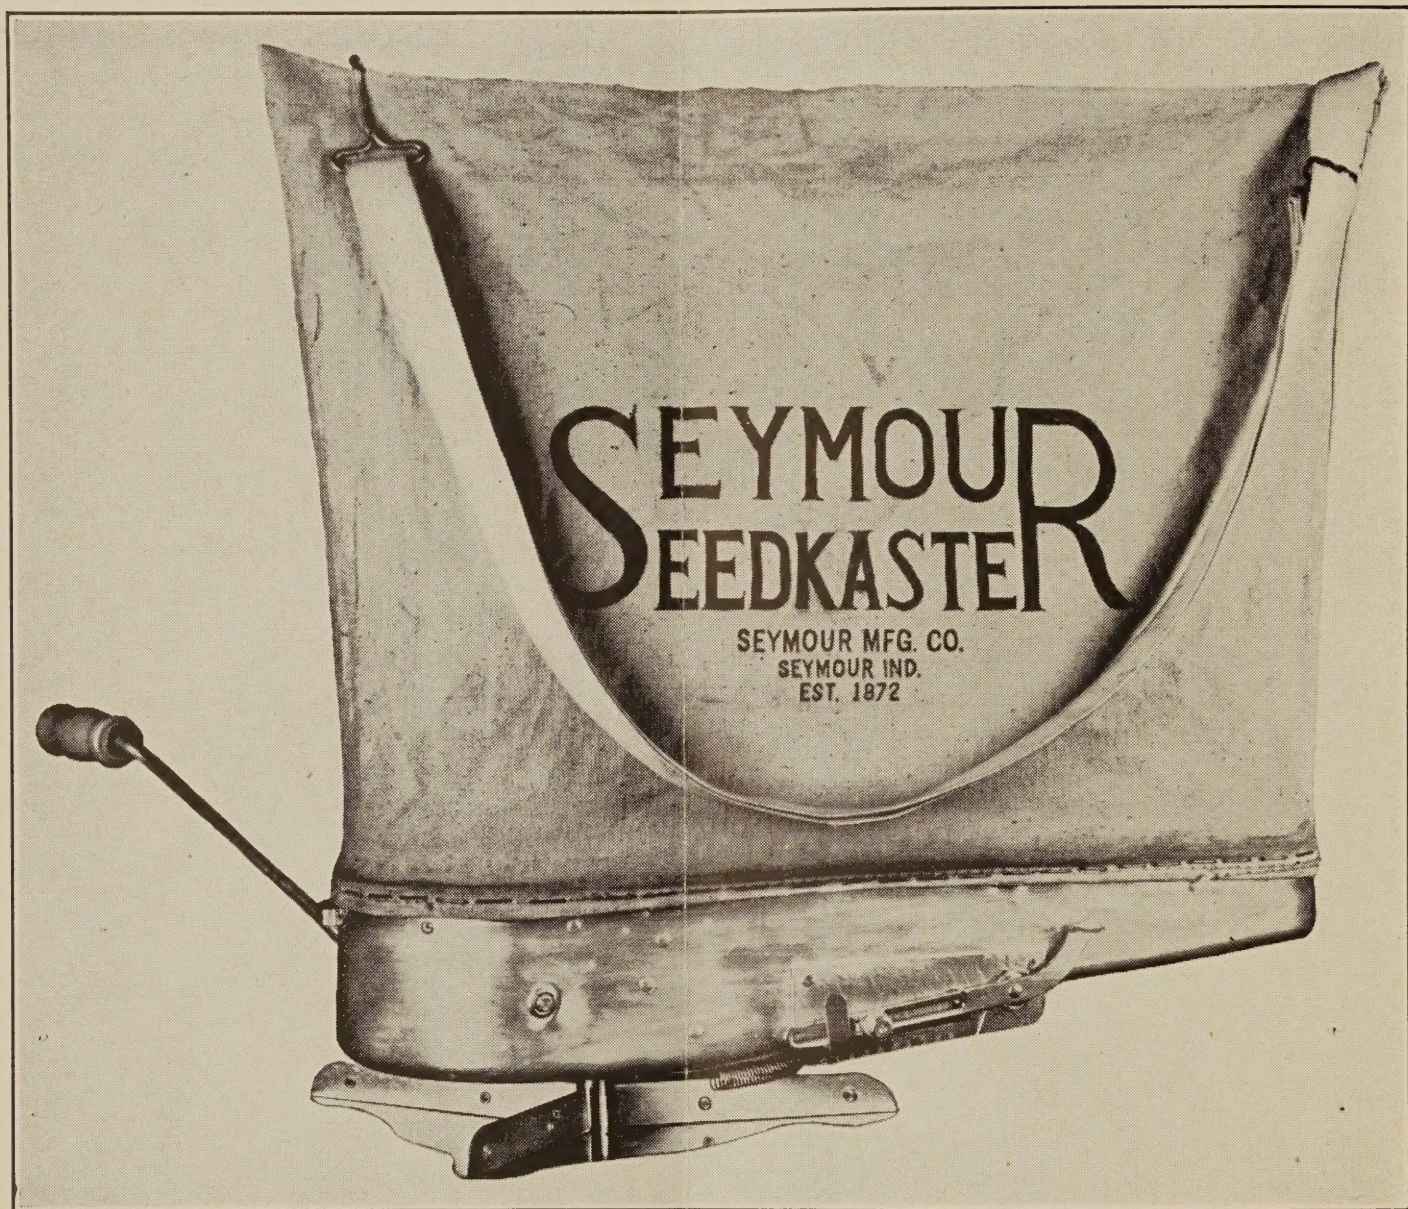

SEYMOUR, INDIANA

*For sale by:*

Bingham Seed Co.

Jacksonville, Florida

SEYMOUR HEAVY DUTY SPREADER for BROADCASTING FERTILIZER AND SEED.  
Accurately Constructed and made of Modern Materials for the Modern Farm.

The Seymour Seedkaster is built of Zincgrip Steel in all of its main parts, with the exception of the canvas seed bag. Zincgrip Steel is produced by a new process which makes the steel rustproof.

The body is one piece of deep drawn steel without a seam or weld. The streamlined steel construction gives strength with lightness. There is no wood to split or warp. The smooth surface of the sloping metal bottom allows the fertilizer or seed to funnel freely toward the outlet.

The gears are sealed within a dust-proof chamber just as the working parts of a fine refrigerator or washing machine are totally enclosed and permanently lubricated so that they will operate indefinitely without oiling or cleaning. The torsional spring drive permits even, positive acceleration; and the non-reversing ratchet coupling provides gradual deceleration of the fan blade. These exclusive features absorb the shocks of starting and stopping, and give smooth operation and longer life. These gears are made of steel, die cut to close tolerances. This accuracy in machining and a gear ratio of 10 to 1 provides ease in operation and gives a speed to the fan which results in wide, even distribution of the seed.

The shutter adjustment is easily and accurately set because the parts are simple, strong and precisely made.

The strong steel construction makes the Seedkaster capable of distributing fertilizer as well as all the seeds that are commonly broadcast.

Capacity 18 quarts. Instructions for use with various seeds supplied with each Seedkaster. Packed 2 in a strong fiberboard container. Shipping weight 48 lbs. per doz.
